Seguridad	**balsa de salvamento, chalecos salvavidas, EPIRB**
Toldos	**bimini-top**
Velas	**gennaker**

Descripción

Main DescriptionA Proven World-Cruising Catamaran - Ready to Sail
Full 25-minute walkthrough video available
MULAN is a 2024 Excess 14 Pulse Line that has already done what most buyers are only preparing for. Delivered new in October 2024, she completed a full circumnavigation with the World ARC in April 2026, sailing approximately 32,000 nautical miles, including Atlantic and Pacific crossings.
Eighteen months of continuous offshore sailing mean her commissioning and teething issues have been found and resolved, and her systems have been set up and refined for real long-distance use. She has been maintained to ARC standards throughout, with engines serviced at 50/200-hour intervals.
The Excess 14 Pulse Line combines true sailing performance with the space and comfort of a 45 ft catamaran. MULAN won several World ARC stages in the catamaran class and performed strongly on the most demanding legs, including the Pacific crossing from the Galápagos Islands to Nuku Hiva, with a best 24-hour run of 225 nautical miles.
She is offered with an extensive cruising inventory: lithium batteries with 2,000 W of solar, a hydrogenerator and a 10 kVA generator; full ARC-compliant offshore safety equipment; a performance sail wardrobe including a new Parasailor and Code 0; Starlink, watermaker, spares, tools and water toys. Recent additions include a new fridge/freezer and a new galley foot pump.
For buyers who would rather spend their time sailing than preparing, MULAN saves the months of commissioning, fitting out and shakedown a new boat requires. She is ready to continue cruising.
MULAN is lying at Grenada Marine, Grenada, close to the international airport, and is available to view by appointment. Worldwide delivery can be arranged, and the owner can support handover and familiarisation by arrangement.
KEY FEATURES
Excess 14 - Pulse Line version
Delivered October 2024
World ARC circumnavigation completed April 2026 - approx. 32,000 nm
World ARC stage wins in the catamaran class
4 double cabins / 4 heads + skipper cabin
CE Category A - Ocean
Twin Yanmar 4JH57 57 HP engines, 3-blade folding propellers
400 Ah lithium battery bank, 2,000 W solar, Watt & Sea hydrogenerator
Fischer Panda 10 kVA generator
New Parasailor (170 m²), Code 0 and gennaker
Starlink Performance, Iridium GO and Yellow, Brick tracker
New fridge/freezer and galley foot pump (2026)
Full offshore safety equipment to ARC standard
Lying Grenada - viewings by appointment
Broker's comments
MULAN suits buyers who want a well-equipped, offshore-proven catamaran they can sail away, without the time and cost of commissioning and fitting out a new boat. Service records and a full inventory are available on request.
Full Specification and InventoryDESIGN, HULL & CONSTRUCTION
Builder: Excess Catamarans (Groupe Beneteau)
Model: Excess 14 - Pulse Line
Year: 2024 (delivered October 2024)
Length Overall (incl. Pulse Line bowsprit): 15.99 m
Hull Length: 13.97 m (45 ft 10 in)
Displacement: 12,800 kg
Bridge Clearance: 21.54 m
CE Category: A - Ocean
Construction: GRP
Keels: Short fixed keels
The Pulse Line specification improves both looks and performance, with lightweight construction elements, composite steering wheels and a refined sail plan.
